

#B36-500 LOG SET

NOTE: Log numbers are located on the bottom of each log. Refer to the following instructions and illustrations for proper log placement. Your components may look different than the ones shown.

CAUTION: Do not place logs directly over burner port holes. Improper log placement may affect flame appearance, and may cause excessive soot to build upon the glass.

1. Position the ember panel in front of the burner.

2. Align the holes in the bottom of the base logs (B36-1 to B36-4) with the mounting pins on the burner. Push the logs down on to pins to seat.
3. Align logs B36-5 and B36-6 with the notches on the base logs.
4. Align log B36-7 with the bracket on the burner and the notch on the ember panel.
5. Distribute rockwool embers onto the logs and burner using a stiff bristle brush.
