

⚠ WARNING: This product can expose you to chemicals including Ethylbenzene which is [are] known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov.

NOTE: Paint may discolor or fade when placed directly over the burner.

- *If converting to propane, complete the conversion before installing the Geometric Sphere Set. Follow the conversion instructions included with the kit.*
- *If installing a black glass panel set, complete installation of panel set before Geometric Sphere Set installation*

Instructions

1. Install crushed media on burner and perimeter media trays.
2. Install Geometric Sphere Set in an alternating pattern of large and small. Figure 1 shows the front view of the recommended layout. Figure 2 shows a side view. Make sure the spheres do not touch the firebox glass.

Note: We placed a metal panel (unpainted) behind the spheres to create better visibility for these instructions. The back of your firebox will be painted black or you will have black glass panels installed.

Note: There are (3) small and (3) large spheres provided with this kit. We recommend using (3) large and (2) small spheres for the Generation 6020 models and recommend using all the provided spheres in the Generation 7220. Do not install a sphere to inhibit the pilot flame.
